PROFILE

Senior Business Analyst / Requirements Engineer with 10 years of experience across B2B SaaS and enterprise software in product-led and client-facing environments. Specialised in requirements engineering, functional analysis, product delivery and platform integrations. Translates business and system needs into clear, structured and testable requirements, working with stakeholders, Product and Engineering from discovery and feasibility through implementation, validation and release. Experienced in complex workflows, integrations, cross-platform requirements, testing and application issue analysis.

PROFESSIONAL EXPERIENCE

SENIOR BUSINESS ANALYST | PRODUCT & PLATFORM DELIVERY

Docebo Inc.

EdTech B2B SaaS | Global (Remote) | September 2022 - April 2026

- Led requirements engineering and functional analysis across multiple product streams for a global B2B SaaS learning platform serving millions of users.
- Elicited and translated product and business needs into structured functional, non-functional and technical requirements, technical specifications, use cases, acceptance criteria, workflows, UML models, business rules and expected system behaviours, clarifying edge cases before development and validation.
- Considered mobile impact for app-accessible product features, collaborating with the mobile team on expected behaviour, compatibility, dependencies and release sequencing.
- Partnered with Product Management, UX/UI, technical leads and delivery teams to define scope, assess feasibility, refine backlog items and resolve impacts and dependencies through implementation, testing and release.
- Led functional analysis for platform and third-party integrations, defining API requirements, permission models, data flows, cross-system interactions, dependencies, edge cases and downstream impacts.
- Used SQL, product-usage data and customer feedback to investigate product behaviour, validate assumptions and support requirements decisions.
- Defined requirements for complex product initiatives including AI-enabled search capabilities, asynchronous learning workflows (ILT/VILT) and third-party integrations, covering behaviours, limitations, permissions, dependencies and edge cases.
- Owned L2 functional support for assigned product areas, analysing escalated issues against requirements and business rules, resolving behaviour clarifications and coordinating potential defects with Engineering.

IT BUSINESS ANALYST | SOLUTION DELIVERY

Eustema SpA

LegalTech B2B SaaS | Italy (Remote) | October 2018 - September 2022

- Performed business and functional analysis across product evolution and client-specific implementations of a highly configurable LegalTech platform, translating operational and regulatory needs into functional and technical requirements, workflows, business rules, use cases and implementation documentation.
- Led workshops and stakeholder interviews involving hundreds of stakeholders across dozens of public-sector projects to elicit needs, define scope, validate processes and align business and technical stakeholders.
- Mapped business processes, application flows and user journeys and produced functional wireframes, translating requirements into explicit end-to-end interactions for stakeholder validation and development.
- Defined integration and data migration requirements across distributed public-sector systems, documenting interfaces, data logic and cross-system dependencies and coordinating testing and release preparation with technical teams.

- Prepared structured test and acceptance documentation and performed manual functional and UAT validation with technical stakeholders and end users, comparing actual and expected behaviour and supporting defect analysis and resolution.
- Produced user manuals, operational guides and training materials, and conducted user training to improve platform adoption and operational readiness.

IT BUSINESS ANALYST | IT CONSULTANT
NS12 SpA
Transportation & Real Estate | Digital Transformation | Italy | January 2018 - September 2018

- Gathered and analysed business needs for transportation and real-estate initiatives, translating them into structured IT requirements, workflows and functional/technical documentation.
- Supported testing and implementation through requirement clarification, issue analysis and user validation, contributing to the digitalisation of manual workflows.

APPLICATION SUPPORT ANALYST
Infoclodio SRL
ERP & Legal Business Applications | Italy | July 2016 - December 2017

- Analysed application issues, clarified functional needs and configured ERP/legal applications, acting as the link between end users and technical teams for issue resolution.

EDUCATION

BSc in Computer Engineering - Roma Tre University

CERTIFICATIONS & TRAINING

- IREB Certified Professional for Requirements Engineering - Foundation Level (CPRE-FL)
- Scrum Fundamentals Certified (SFC) - SCRUMstudy
- AI Foundations: Technical, Ethical and Cultural Dimensions - University of Urbino Carlo Bo

CORE SKILLS & TOOLS

Business & Requirements Analysis: Requirements Engineering | Functional Analysis | Stakeholder Workshops | Process Mapping | Functional & Non-functional Requirements | Technical Specifications | Acceptance Criteria | Business Rules

Product & Application Analysis: Feature Definition | Impact Analysis | Cross-platform Requirements | L2 Functional Support | Behaviour & Issue Analysis

Integrations & Modelling: REST APIs | Data Flows | Permission Models | Data Migration | Cross-system Dependencies | BPMN 2.0 | UML

Testing & Delivery: Functional Testing | UAT | Test & Acceptance Documentation | Requirement Validation | Defect Analysis | Release Readiness

Tools & Data: Jira | Confluence | Productboard | Figma | diagrams.net | BPMN.io | SQL | Pendo | Zendesk
