Portfolio: <https://elenaticca.github.io/portfolio/>

Zurich, Switzerland | EU Citizen (Italy)

Senior Business Analyst with 10 years of experience across B2B SaaS, enterprise applications, and complex digital delivery environments. Strong background in requirements engineering, functional analysis, and solution design support, translating business needs and system complexity into clear functional, non-functional and technical requirements, business rules, use cases, and analysis artefacts. Experienced in product-led and client-facing contexts, working across business, product, UX/UI, and technical teams to clarify scope, validate feasibility, and support scalable delivery. Recognised for analytical thinking, clear documentation, and the ability to connect business needs, product direction, and system logic.

PROFESSIONAL EXPERIENCE

SENIOR BUSINESS ANALYST | PRODUCT & PLATFORM DELIVERY

Docebo Inc.

EdTech B2B SaaS | Global (Remote) | September 2022 - Present

- Lead requirements engineering and functional analysis activities while supporting delivery alignment across multiple product streams within a global B2B SaaS learning platform serving millions of users.
- Translate business needs into clear and structured requirements, covering functional, non-functional and technical requirements, use cases, process and user flows, UML models, business rules, and system behaviours
- Collaborate with UX/UI, technical leads, and delivery teams to support solution design, feature validation, impact analysis, and alignment between business needs and technical execution.
- Work with Product Management and delivery stakeholders on scope definition, backlog refinement, requirement clarification, feasibility assessment, and release readiness.
- Inform prioritisation and requirement refinement through SQL data analysis, usage and adoption signals, customer feedback, and behavioural insights.
- Lead functional analysis for platform and third-party integrations, defining requirements across data exchange, access rules, system interactions, dependencies, and impacts across connected components.
- Contribute to AI-enabled product initiatives by supporting discovery, requirements definition, expected behaviours, limitations, and cross-functional execution.

IT BUSINESS ANALYST | SOLUTION DELIVERY

Eustema SpA

LegalTech B2B SaaS | Italy (Remote) | October 2018 - September 2022

- Gathered and analysed business needs within client-facing LegalTech initiatives, translating them into structured IT and functional requirements, workflows, business rules, use cases, and supporting documentation for a highly customisable digital platform.
- Worked across product and project delivery contexts, supporting the adaptation of platform capabilities to specific client needs, operational processes, regulatory constraints, and implementation requirements.

- Led workshops and stakeholder interviews involving hundreds of stakeholders across dozens of projects to elicit needs, clarify scope, validate processes, and support shared understanding.
- Mapped business processes, application flows, user journeys, and business rules to support solution design, technical feasibility discussions, implementation readiness, and alignment across business and technical stakeholders.
- Analysed integration and data migration requirements across distributed public-sector systems, defining functional and technical documentation in collaboration with technical teams and coordinating related testing and release preparation activities.
- Prepared user manuals, operational guides, and training materials, supporting user training activities to improve platform adoption and operational readiness.

IT BUSINESS ANALYST | IT CONSULTANT

NS12 SpA

Transportation & Real Estate | Digital Transformation | Italy | January 2017 - September 2018

- Gathered and analysed business needs within client-facing digital transformation initiatives, translating them into structured IT requirements, workflows, functional documentation, and implementation support materials.
- Produced functional, technical, and operational documentation to ensure consistency across delivery streams and support communication between business stakeholders and technical teams.
- Contributed to process modernisation initiatives aimed at replacing manual activities with more standardised digital workflows.
- Supported delivery and testing activities through requirement clarification, issue analysis, user validation, and implementation readiness support.

APPLICATION SUPPORT ANALYST

Infoclodio SRL

ERP & Legal Business Applications | Italy | July 2016 - December 2017

- Managed issue analysis, functional clarification, configuration activities, and user guidance across business applications.
- Worked with ERP-related workflows and legal software environments in day-to-day operational contexts.
- Acted as a link between end users and technical teams to help maintain operational continuity and effective issue resolution.
