Portfolio: <https://elenaticca.github.io/portfolio/>

Zurich, Switzerland | EU Citizen (Italy)

Senior Business Analyst with 10 years of experience across B2B SaaS, enterprise applications, and complex digital delivery environments.

Strong background in requirements engineering, functional analysis, and solution design support, with the ability to translate business needs and system complexity into clear, structured requirements across IT, product, and business dimensions, including functional and non-functional requirements, technical specifications, business rules, use cases, and supporting analysis artefacts. Experienced in product-led and client-facing contexts, working with business, product, UX/UI, and technical stakeholders to clarify scope, validate feasibility, support scalable solution delivery, and improve workflows, usability, and user experience.

Recognised for strong analytical thinking, clear documentation, and the ability to connect business needs, product direction, and system logic across cross-functional environments.

PROFESSIONAL EXPERIENCE

SENIOR BUSINESS ANALYST

Docebo Inc.

EdTech B2B SaaS | Global (Remote) | September 2022 - Present

- Lead requirements engineering and functional analysis activities while supporting delivery alignment across multiple product streams within a global B2B SaaS learning platform serving millions of users.
- Translate business needs into structured IT requirements, covering functional, non-functional and technical requirements, user flows, use cases and system behaviours to support delivery-ready implementation.
- Collaborate with UX/UI, technical leads, and IT delivery teams to support solution design, feature validation, implementation impact analysis, and alignment between business needs and technical execution.
- Work with Product Management and delivery stakeholders on scope definition, backlog refinement, requirement clarification, feasibility assessment, and release readiness.
- Inform prioritisation and requirement refinement through SQL data extraction and analysis, combined with usage and adoption signals, customer feedback, and behavioural insights.
- Lead functional analysis for platform and third-party integrations, defining integration requirements across APIs, permission models, cross-system interactions, dependencies, and impacts across connected components.
- Clarify complex workflows, application behaviours, and edge cases to reduce ambiguity during development and testing.
- Contribute to AI-enabled initiatives, including Global Search and internal Copilot capabilities, by supporting discovery, requirements definition, and cross-functional execution.

IT BUSINESS ANALYST | SOLUTION DELIVERY

Eustema SpA

LegalTech B2B SaaS | Italy (Remote) | October 2018 - September 2022

- Gathered and analysed business needs, translated them into IT requirements, mapped workflows, and contributed to delivery and testing activities within client-facing digital transformation initiatives.

- Performed requirement definition, clarification, validation, and release preparation activities across multiple software projects.
- Led workshops and stakeholder interviews involving hundreds of stakeholders across dozens of projects.
- Mapped business processes, application flows, user journeys, and business rules to support solution design, technical feasibility discussions, implementation readiness, and shared understanding across business and technical stakeholders.
- Analysed integration and data migration requirements across distributed public-sector systems, defining functional and technical documentation in collaboration with technical teams and coordinating related testing and release preparation activities.
- Prepared user manuals, operational guides, and training materials, supporting user training activities to improve platform adoption and operational readiness.

IT BUSINESS ANALYST | IT CONSULTANT

NS12 SpA

Transportation & Real Estate | Digital Transformation | Italy | January 2017 - September 2018

- Gathered and analysed business needs, translated them into IT requirements, mapped workflows, and contributed to delivery and testing activities within client-facing digital transformation initiatives.
- Produced functional, technical, and operational documentation to ensure consistency across delivery streams.
- Contributed to process modernisation initiatives aimed at replacing manual activities with more standardised digital workflows.

APPLICATION SUPPORT ANALYST

Infoclodio SRL

ERP & Legal Business Applications | Italy | July 2016 - December 2017

- Managed issue analysis, functional clarification, configuration activities, and user guidance across business applications.
- Worked with ERP-related workflows and legal software environments in day-to-day operational contexts.
- Acted as a link between end users and technical teams to help maintain operational continuity and effective issue resolution.

EDUCATION

- **Bachelor's Degree in Computer Engineering** - Roma Tre Univ.
- **AI Foundations: Technical, Ethical, and Cultural Dimensions** - Urbino Carlo Bo Univ.
