PROFILE

Senior Business Analyst and Requirements Engineer with 10 years of experience across B2B SaaS, enterprise software and consulting, working at the intersection of Product, Business and Engineering with distributed cross-functional teams in international environments.

Responsible for the full requirements cycle, from problem discovery and AS-IS analysis to scope, prioritisation, functional and technical requirements, implementation support, validation and release. Strong technical grounding in APIs, integrations, data flows, SQL and system dependencies, working with Engineering to evaluate feasibility, trade-offs and downstream impacts.

Delivered custom projects for public-sector clients, contributed to turning one of them into a configurable product, and helped evolve a mature global SaaS LMS e-learning platform.

Experience across LegalTech, e-learning, real estate and transportation, with hands-on involvement in product discovery, feature definition, backlog refinement and prioritisation.

PROFESSIONAL EXPERIENCE

PRODUCT BUSINESS ANALYST | PRODUCT & PLATFORM DELIVERY

Docebo Inc.

EdTech B2B SaaS | LMS | Global (Remote) | September 2022 - Present

- Led end-to-end requirements engineering across multiple product streams, from discovery and impact analysis to solution definition, implementation support, validation and release, covering functional, non-functional and technical requirements.
- Owned requirements for complex initiatives including AI-enabled search and Copilot capabilities and third-party integrations, analysing API requests and responses, payloads, permissions, configuration parameters and data flows, and defining changes to exchanged data and validation rules.
- Assessed whether needs could be addressed through existing product capabilities before proposing new features, using customer feedback, SQL extracts and usage and adoption data to support solution and prioritisation decisions.
- Defined scope and exclusions, user stories and acceptance criteria, and recommended to Product Management the sequencing of development increments based on impact, feasibility and dependencies; explained to stakeholders if, when and why out-of-roadmap requests would enter planning.
- Worked closely with Product Management, Design and Engineering to challenge assumptions and evaluate feasibility and trade-offs; acted as a functional escalation point for customer-reported issues.
- Introduced a standardised requirements specification structure, creating a shared language across business and technical stakeholders.

IT BUSINESS ANALYST | SOLUTION DELIVERY
Eustema SpA
LegalTech B2B SaaS | IT Consulting | Italy (Remote) | October 2018 - August 2022

- Contributed to transforming a customer-specific LegalTech project into a configurable product adopted and progressively expanded across multiple public-sector clients.
- Coordinated a team of Business Analysts within the dedicated company spin-off.
- Led discovery and workshops across several customer-specific public-sector projects, reconstructing processes and regulatory constraints and translating them into functional and technical requirements; identified recurring needs to turn into reusable product capabilities.
- Owned the full requirements cycle, including functional and technical specifications, integrations and data migrations, working with architects, team leads, developers and designers on AS-IS / TO-BE processes, business rules, data flows and cross-system dependencies.
- Structured delivery into incremental releases and validated backend and frontend changes with developers across test and pre-production environments; organised developer workload across multiple customer projects.
- Defined and executed UAT in pre-production, managed change requests and defect resolution, coordinated production releases, and delivered end-user training and documentation after go-live.

IT BUSINESS ANALYST | IT CONSULTANT
NS12 SpA | Almaviva SpA
Transportation & Real Estate | Digital Transformation | Italy | January 2018 - September 2018

- Led requirements engineering for digital transformation projects built from the ground up, translating business needs into functional and technical requirements, workflows and solution specifications.
- Modelled business processes, application behaviour, data flows and system interactions.
- Translated requirements into implementation-ready scope and coordinated activities across frontend and backend teams, including integrations, data exchanges and technical dependencies.
- Performed functional testing and defect analysis, working directly with developers to investigate discrepancies between expected and actual behaviour through resolution and user validation.
- Defined requirements and technical documentation for transportation infrastructure projects, including compliance requirements, RACI matrices and an Incident Management technical guide.

APPLICATION SUPPORT ANALYST
Infoclodio SRL
ERP & Legal Business Applications | Italy | July 2016 - December 2017

- Provided functional support for ERP and legal business applications, analysing user needs and application issues, configuring solutions and acting as the link between end users and technical teams during troubleshooting and resolution.

EDUCATION

BSc in Computer Engineering
Roma Tre University

CERTIFICATIONS & TRAINING

- **IREB CPRE-FL** Certified Professional for Requirements Engineering
- **Scrum Fundamentals Certified (SFC)** - SCRUMstudy
- **AI Foundations: Technical, Ethical and Cultural Dimensions** - University of Urbino Carlo Bo

CORE SKILLS & TOOLS

Product & Requirements: Product Discovery | Product Management | Requirements Engineering | Functional Analysis | AS-IS / TO-BE Analysis | Scope & Feature Definition | Prioritisation | Backlog Refinement | User Stories & Acceptance Criteria | Business Rules | Feasibility, Impact & Dependency Analysis | Requirements Traceability

Systems & Integrations: REST APIs | Request/Response & Payload Analysis | JSON/XML | System Integration | Data Flows | Data Migration | Permission Models | Data Validation Rules | Cross-system Analysis | SQL

Process, Testing & Delivery: BPMN 2.0 | UML | Agile / Scrum | Functional Testing | UAT | Defect & Root Cause Analysis | Technical Troubleshooting | Change Request Management | Production Release Coordination | Workshop Facilitation | Stakeholder Management

Tools: Jira | Confluence | Productboard | Pendo | Postman | DBeaver | Figma | FigJam | BPMN.io | diagrams.net
