PROFILE

Business Analyst and Requirements Engineer with 10 years of experience across B2B SaaS, enterprise software and consulting environments. Throughout my career, I have translated business, operational and product needs into clear system requirements and implementable solutions, bridging business stakeholders and technical teams. My experience spans the full solution lifecycle, from analysis and requirements definition through solution design, implementation, migration, validation and application support.

PROFESSIONAL EXPERIENCE

PRODUCT BUSINESS ANALYST | PRODUCT & PLATFORM DELIVERY

Docebo Inc.

EdTech B2B SaaS | Global (Remote) | September 2022 - April 2026

- Led end-to-end requirements engineering across multiple product streams, covering functional, non-functional and technical requirements, and introduced a standardised specification template to establish consistent structure and terminology for business and technical stakeholders.
- Defined functional behaviour for platform capabilities and third-party integrations, specifying interactions across systems, data, permissions and APIs and identifying downstream impacts before development.
- Acted as the primary functional point of reference from discovery to release, defining feature scope, breaking down requirements into user stories and aligning implementation priorities with Product Management, UX/UI and Engineering.
- Owned requirements definition for complex product initiatives including AI-enabled search, ILT/VILT capabilities and external integrations, using documentation analysis, product data, SQL and customer feedback to investigate system behaviour and support solution decisions.
- Acted as a functional escalation point for customer-reported issues, liaising with Customer Support and directly with customers when needed to clarify system behaviour and coordinate defect resolution with Engineering.

IT BUSINESS ANALYST | SOLUTION DELIVERY

Eustema SpA

LegalTech B2B SaaS | IT Consulting | Italy (Remote) | October 2018 - September 2022

- Led requirements elicitation through stakeholder interviews and workshops across dozens of public-sector projects, working with business representatives and end users to clarify needs, define scope and validate requirements.
- Translated client-specific operational and regulatory needs into functional and technical requirements for custom LegalTech SaaS solutions, identifying opportunities to develop reusable platform capabilities for subsequent customer implementations.
- Modelled business processes and application behaviour, and introduced standardised requirements documentation and a product manual to support consistent communication across business users and development teams.
- Translated validated requirements into implementation-ready development scope, coordinating development planning and workload allocation
- Defined requirements for custom application capabilities, system integrations and data migrations, analysing interfaces, data logic, dependencies and cross-system impacts throughout implementation.
- Supported UAT and defect resolution directly with customers and developers, and delivered post-release training to end users.

IT BUSINESS ANALYST | IT CONSULTANT
NS12 SpA
Transportation & Real Estate | Digital Transformation | Italy | January 2018 - September 2018

- Led requirements engineering for greenfield digital transformation projects, eliciting and analysing business needs and translating them into functional and technical requirements, workflows and solution specifications.
- Modelled business processes, application behaviour, data flows and system interactions for solutions developed from the ground up.
- Translated requirements into implementation-ready development scope and coordinated development activities across frontend and backend teams.
- Defined and validated requirements for system integrations and data exchanges, analysing interface behaviour and resolving functional and technical issues with developers.
- Drove functional testing and defect analysis, reproducing issues, identifying discrepancies between expected and actual behaviour and working directly with developers through resolution and user validation.

APPLICATION SUPPORT ANALYST
Infoclodio SRL
ERP & Legal Business Applications | Italy | July 2016 - December 2017

- Analysed application issues, clarified functional needs and configured ERP/legal applications, acting as the link between end users and technical teams for issue resolution.

EDUCATION

BSc in Computer Engineering - Roma Tre University

CERTIFICATIONS & TRAINING

- IREB Certified Professional for Requirements Engineering - Foundation Level (CPRE-FL)
- Scrum Fundamentals Certified (SFC) - SCRUMstudy
- AI Foundations: Technical, Ethical and Cultural Dimensions - University of Urbino Carlo Bo

CORE SKILLS & TOOLS

Business & Requirements Analysis: Requirements Engineering | Functional Analysis | Requirements Elicitation | Process Mapping | Acceptance Criteria | Business Rules | Impact Analysis

Systems & Integration: REST APIs | Data Flows | Data Migration | Cross-system Analysis | BPMN 2.0 | UML

Testing & Data: Functional Testing | UAT | SQL

Tools: Jira | Confluence | Productboard | Figma | diagrams.net | Pendo

LANGUAGES

Italian - Native | English - Professional working proficiency | German - Beginner
