PROFILE

Senior Business Analyst and Requirements Engineer with 10 years of experience across B2B SaaS, enterprise software and consulting, working at the intersection of Product, Business and Engineering and collaborating with distributed cross-functional teams in international environments.

Experienced across the full solution lifecycle, from problem discovery and AS-IS analysis to scope and prioritisation, functional and technical requirements, implementation support, validation and release. Strong technical grounding in APIs, integrations, data flows, SQL and system dependencies, working closely with Product and Engineering to evaluate feasibility, trade-offs and downstream impacts.

Experienced in both building configurable products from the ground up and evolving mature global SaaS platforms, with hands-on involvement in product discovery, feature definition, backlog refinement and prioritization.

PROFESSIONAL EXPERIENCE

PRODUCT BUSINESS ANALYST | PRODUCT & PLATFORM DELIVERY

Docebo Inc.

EdTech B2B SaaS | Global (Remote) | September 2022 - Present

- Led end-to-end requirements engineering and product analysis across multiple product streams, from discovery and impact analysis through solution definition, implementation support, validation and release, covering functional, non-functional and technical requirements.
- Worked closely with Product Management, UX/UI and Engineering teams in an international environment to challenge assumptions, assess feasibility, constraints and dependencies, evaluate functional and technical trade-offs, and define implementable solutions.
- Defined feature scope, business rules, user stories and acceptance criteria; supported backlog refinement, prioritisation and implementation sequencing based on impact, feasibility, dependencies
- Defined functional and technical behaviour for platform capabilities and third-party integrations, analysing APIs requests and responses, payloads, permissions, configuration parameters, data flows and changes to data exchange structures and validation rules.
- Owned requirements for complex initiatives including AI-enabled search and Copilot capabilities, ILT/VILT functionality and external integrations, using product data, SQL, technical documentation and customer feedback to investigate system behaviour and support solution decisions.
- Investigated product, integration and configuration issues with Engineering and acted as a functional escalation point for customer-reported issues, including direct customer clarification when needed.
- Introduced a standardised requirements specification structure to improve consistency across business and technical stakeholders.

IT BUSINESS ANALYST | SOLUTION DELIVERY
Eustema SpA
LegalTech B2B SaaS | IT Consulting | Italy (Remote) | October 2018 - September 2022

- Participated in transforming a customer-specific LegalTech project into a configurable product progressively adopted and expanded across multiple public-sector clients, later coordinating a team of Business Analysts within the dedicated company spin-off.
- Led discovery and requirements elicitation across several public-sector projects, translating operational and regulatory needs into functional and technical requirements and identifying recurring needs that could become reusable product capabilities.
- Worked with architects, team leads, developers and designers to define the product foundations and model AS-IS / TO-BE processes, application behaviour, business rules, integrations, data flows, migrations and cross-system dependencies.
- Structured implementation into smaller incremental releases and worked closely with developers to validate backend and frontend changes across test and pre-production environments.
- Defined and executed UAT in pre-production, supported defect resolution, coordinated production releases and delivered training to end users after go-live.
- Translated validated requirements into implementation-ready development scope, supporting feasibility assessment, implementation planning and developer workload allocation across multiple customer projects.

IT BUSINESS ANALYST | IT CONSULTANT
NS12 SpA
Transportation & Real Estate | Digital Transformation | Italy | January 2018 - September 2018

- Led requirements engineering for brand-new digital transformation projects, translating business needs into functional and technical requirements, workflows and solution specifications.
- Modelled business processes, application behaviour, data flows and system interactions for solutions developed from the ground up.
- Translated requirements into implementation-ready scope and coordinated activities across frontend and backend teams, including integrations, data exchanges and technical dependencies.
- Performed functional testing and defect analysis, working directly with developers to investigate discrepancies between expected and actual behaviour through resolution and user validation.

APPLICATION SUPPORT ANALYST
Infoclodio SRL
ERP & Legal Business Applications | Italy | July 2016 - December 2017

- Provided functional support for ERP and legal business applications, analysing user needs and application issues, configuring solutions and acting as the link between end users and technical teams during troubleshooting and resolution.

EDUCATION

BSc in Computer Engineering
Roma Tre University

CERTIFICATIONS & TRAINING

- **IREB CPRE-FL** Certified Professional for Requirements Engineering
- **Scrum Fundamentals Certified (SFC)** - SCRUMstudy
- **AI Foundations: Technical, Ethical and Cultural Dimensions** - University of Urbino Carlo Bo

CORE SKILLS & TOOLS

Product & Requirements: Product Discovery | Product Management | Requirements Engineering | Functional Analysis | AS-IS / TO-BE Analysis | Scope & Feature Definition | Prioritisation | Backlog Refinement | User Stories & Acceptance Criteria | Business Rules | Feasibility, Impact & Dependency Analysis

Systems & Integrations: REST APIs | Request/Response & Payload Analysis | JSON/XML | System Integration | Data Flows | Data Migration | Permission Models | Data Validation Rules | Cross-system Analysis | SQL

Process, Testing & Delivery: BPMN 2.0 | UML | Postman | Functional Testing | UAT | Defect & Root Cause Analysis | Technical Troubleshooting | Production Release Coordination | Workshop Facilitation | Cross-functional Collaboration

Tools: Jira | Confluence | Productboard | Figma | FigJam | BPMN.io | diagrams.net | DBeaver | Pendo

LANGUAGES
