PROFILE

Senior Business Analyst with 10 years of experience across B2B SaaS, enterprise software and digital transformation initiatives, working in both product-led and client-facing delivery environments. Specialised in requirements engineering, functional analysis, product delivery and platform integrations. Translates business needs and system constraints into structured functional, non-functional and technical requirements, technical specifications, use cases, acceptance criteria, business rules and UML/BPMN models. Partners with business stakeholders, Product, UX/UI and Engineering from discovery and scope definition through backlog refinement, validation and release readiness, reducing ambiguity and aligning product intent with technical delivery.

PROFESSIONAL EXPERIENCE

SENIOR BUSINESS ANALYST | PRODUCT & PLATFORM DELIVERY

Docebo Inc.

EdTech B2B SaaS | Global (Remote) | September 2022 - April 2026

- Led requirements engineering and functional analysis across multiple product streams for a global B2B SaaS learning platform serving millions of users.
- Elicited and translated product and business needs into structured functional, non-functional and technical requirements, technical specifications, use cases, acceptance criteria, workflows, UML models, business rules and expected system behaviours, clarifying edge cases before development and validation.
- Partnered with Product Management, UX/UI, technical leads and delivery teams to define scope, assess feasibility, refine backlog items and resolve impacts and dependencies through implementation, testing and release.
- Led functional analysis for platform and third-party integrations, defining API requirements, permission models, data flows, cross-system interactions, dependencies, edge cases and downstream impacts.
- Used SQL-based data extraction, product-usage signals and customer feedback to test assumptions, refine requirements and inform prioritisation.
- Defined functional requirements for AI-enabled initiatives, including Global Search and internal Copilot capabilities, covering use cases, expected behaviours, limitations and fallback logic from discovery through delivery.
- Specified complex ILT/VILT workflows covering course and session duplication, enrolment handling, asynchronous processing and integrations with Zoom, Microsoft Teams, GoToWebinar and Adobe Connect.

IT BUSINESS ANALYST | SOLUTION DELIVERY

Eustema SpA

LegalTech B2B SaaS | Italy (Remote) | October 2018 - September 2022

- Performed business and functional analysis across product evolution and client-specific implementations of a highly configurable LegalTech platform, translating operational and regulatory needs into functional and technical requirements, workflows, business rules, use cases and implementation documentation.
- Led workshops and stakeholder interviews involving hundreds of stakeholders across dozens of public-sector projects to elicit needs, define scope, validate processes and align business and technical stakeholders.
- Mapped business processes, application flows and user journeys to support solution design, technical feasibility assessment and implementation readiness.
- Defined integration and data migration requirements across distributed public-sector systems, documenting interfaces, data logic and cross-system dependencies and coordinating testing and release preparation with technical teams.

-
- Produced user manuals, operational guides and training materials, and supported user training to improve platform adoption and operational readiness.

IT BUSINESS ANALYST | IT CONSULTANT

NS12 SpA

Transportation & Real Estate | Digital Transformation | Italy | January 2018 - September 2018

- Gathered and analysed business needs for transportation and real-estate digital transformation initiatives, translating them into structured IT requirements, workflows and implementation materials.
- Produced functional, technical and operational documentation to align business stakeholders and technical delivery teams.
- Supported testing and implementation through requirement clarification, issue analysis and user validation, contributing to the replacement of manual activities with standardised digital workflows.

APPLICATION SUPPORT ANALYST

Infoclodio SRL

ERP & Legal Business Applications | Italy | July 2016 - December 2017

- Analysed application issues, clarified functional needs, configured ERP and legal business applications, and guided end users.
 - Acted as the link between users and technical teams to maintain operational continuity and support effective issue resolution.
-

EDUCATION

BSc in Computer Engineering - Roma Tre University

CERTIFICATIONS & TRAINING

- IREB Certified Professional for Requirements Engineering - Foundation Level (CPRE-FL)
 - Scrum Fundamentals Certified (SFC) - SCRUMstudy
 - AI Foundations: Technical, Ethical and Cultural Dimensions - University of Urbino Carlo Bo
-

CORE SKILLS & TOOLS

Business & Requirements Analysis: Requirements Engineering | Functional Analysis | Stakeholder Interviews & Workshops | Process Mapping | Functional and Non-functional Requirements | Technical Specifications | Use Cases | Acceptance Criteria | Business Rules

Product & Delivery Analysis: Feature Definition | Scope Clarification | Backlog Refinement | Feasibility and Impact Analysis | Requirement Validation | Testing Support | Release Readiness

Integrations & Modelling: REST APIs | Integration and Data Migration Requirements | Data Flows | Permission Models | Cross-system Dependencies | BPMN 2.0 | UML

Tools & Data: Jira | Confluence | Productboard | Figma | FigJam | diagrams.net | BPMN.io | SQL | Pendo | Zendesk

LANGUAGES

Italian - Native | English - Full professional proficiency | German - Basic
